DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 31-32 are rejected under 35 U.S.C. 102(e) as being anticipated by RANGAN et al, US Patent no. 6,198,833.

3. As per claim 31, examiner interprets RANGAN et al to disclose in its entirety, " a method for automatically identifying an object in a plurality of video frames and associating the object with an event (column 4, lines 36-42, 66-column 5, line 20, 39-51 and column 11, lines 30-42) comprising:
determining ^{an} the location in one of said video frames where an action by a pointing device has occurred defining ^{the} a selected location (column 2, line 66- column 3, line 54, 55-64, 65-column 4, line 42);

determining a color value of said selected location (column 2, line 66- column 3, line 54, 55-64, 65-column 4, line 42); and
automatically associating an event with said color value in said one video frame and
automatically associating events with said color value in succeeding video frames
(column 2, line 66- column 3, line 54, 55-64, 65-column 4, line 42)".

4. As per claim 32, a system is disclosed rather than a method, as in the
substantially similar recited features of claim 31, therefore, the references of claim 31
apply to claim 32.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to
applicant's disclosure. HUNKE, US Patent no. 5,912,980, as interpreted by examiner
teaches prior art using a pointing device for initial location means (column 2, lines 29-
40) and automatic association between color and location means without use of a
pointing device (column 3, line 15-column 4, line 14).
